You folks are a bunch of really dumb Eco-Communists...

You insist on surging forward will you unworkable scheme, when MOST anglers remain in a state of absolute REBELLION against mindless, sport fishing CLOSURES.

Faced with such opposition by those that actually FUND the DFG, you are doomed to failure.

In spite of no evidence whatsoever, that Closures work, after years of 83 reserves already closed you idiots insist that this is a solution.

Flying in the face of MASSIVE amounts of evidence of the HUGE Socio-Economic harm your crazy plan WILL cause, you choose to blindly chase this dream.

The DFG can't enforce the current codes because they don't have enough Wardens.  
Just ignore this fact also.

Keep having you CLOSED "Public Meetings" in far away places and at times few can attend.

Go ahead and close down the ocean if you can. We the licensed anglers will not obey your insane crap...Keep marching in true Communistic fashion while chanting the Red Mantra of "The ends, justify the means".

As far as me and my friends go, we all agree that you losers can jolly well march to HELL..!
